1. Establishment of categories and standards. The board shall, by regulation promulgated in conformity with Title 5, chapter 375, subchapter II:

A. Establish categories, and where applicable subcategories, of commercial pesticide applicators and government pesticide supervisors depending upon the nature and extent of the pesticide use, the type of pesticide equipment, the degree of knowledge or skill required in their application and such other factors as the board deems relevant, provided that such categories shall be consistent with, but not limited to, the categories established by the United States Environmental Protection Agency; [1981, c. 374, §8 (AMD) .]

B. Establish competency standards for the established categories for the certification and renewal of certification of commercial applicators. Such standards shall require, as a minimum, that the applicant demonstrate, by written examination and, as appropriate, performance testing, knowledge of pests, formulation and labelling of pesticides, equipment and application techniques, safety precautions, potential harmful effects on the environment, and applicable federal and state laws and regulations. [1975, c. 397, §2 (NEW) .]

C. Establish standards for the certification and renewal of certification of private applicators. Such standards shall require that the private applicator indicate satisfactory knowledge of pest problems and pest control practices, including as a minimum the ability to recognize common pests and the damage they cause, to understand the pesticide label, to apply pesticides in accordance with label instructions and warnings, to recognize local environmental situations that must be considered to avoid contamination, to recognize poisoning symptoms and corrective procedures, and to understand applicable federal and state laws and regulations. [1975, c. 397, §2 (NEW) .]

C-1. Establish standards for the certification and renewal of certification of private applicators of general use pesticides. Such standards must require that the private applicator of general use pesticides indicate satisfactory knowledge of pest problems and pest control practices, including as a minimum the ability to recognize common pests and the damage they cause, to understand the pesticide label and to apply pesticides in accordance with label instructions and warnings. [2011, c. 169, §3 (NEW) .]

D. Establish the standards for issuance and renewal of licenses of pesticide dealers. These standards shall include, but not be limited to, requirements concerning transportation of pesticides, the applicant's knowledge of applicable federal and state statutes and regulations, and the applicant's understanding of the dangers involved and the precautions necessary for the safe storage and distribution of pesticides; [1983, c. 819, Pt. A, §51 (AMD) .]

E. Establish guidelines and requirements for reporting of information by commercial applicators, pesticide dealers, spray contracting firms and monitors to the board; [1983, c. 819, Pt. A, §52 (AMD) .]

F. Establish standards for the certification and renewal of certification of government pesticide supervisors. C. On its own or in cooperation with other agencies or persons, publish such information as it deems appropriate, including information concerning injury which might result from improper application or handling of pesticides, and methods and precautions designed to prevent the injury; and [1987, c. 702, §4 (AMD).]

D. Promulgate such other rules and regulations and take such other actions as it deems appropriate to control the use and distribution of pesticides within the State and to otherwise provide that the purposes and policies of this chapter are insured. [1975, c. 397, §2 (NEW).]

[1999, c. 57, Pt. B, §2 (RPR) .]

4. Designation of critical areas. The board may designate critical areas which shall include, but not be limited to, areas where pesticide use would jeopardize endangered species or critical wildlife habitat, present an unreasonable threat to quality of the water supply, be contrary to a master plan for the area where such area is held or managed by an agency of the State or Federal Government, or would otherwise result in unreasonable adverse effects on the public health, welfare or the environment of the area. The designation of a critical area may prohibit pesticide use or may include such limitations on such use as the board deems appropriate. The proceedings to designate a critical area under this section shall conform to Title 5, chapter 375, subchapter II.

[1989, c. 841, §9 (NEW) .]

7. Data collection; report. The board shall implement a system of record keeping, reporting, data collection and analysis that provides information on the quantity of product and brand names of pesticides sold. The board, in cooperation with the University of Maine Cooperative Extension Service, shall study ways to improve pesticide information data bases and to optimize the useful analysis of reported information.

Before April 1, 2002, the board shall submit a report on pesticide activities during the previous calendar year to the joint standing committee of the Legislature having jurisdiction over pesticide control matters. The report must contain sales information on quantities of pesticides sold listed by the common name of the active ingredient.

The board shall also include in the report aggregate data on pesticide use based on reports submitted to the board by commercial applicators and other persons required to submit reports under this chapter and rules adopted pursuant to this chapter. The board shall provide the data by sector of use whenever possible. The board shall provide the data by category of pesticide, including data for herbicides, insecticides, fungicides and other major categories. In addition, the board shall include in the report a summary of survey results or other information published by the University of Maine Cooperative Extension Service or the United States Department of Agriculture relating to pesticides use in the State.

The board shall develop a measure to estimate sales and types of pesticides commonly used by homeowners and track trends in the quantities and types of pesticides used by homeowners.

The board shall provide historical information on pesticide use and sales in the report when the information available is appropriate for comparison.
